The word has gone out that business is quickly recovering, and that a brisk trade and lively movement in almost all lines may be expected right away.

It is thought that the Vooches silver repelling bill will pass in preference to the Wilson bill, as the former differs from the latter in no important particular.

at 270,000,000 bushels, the trade in which should stiffen prices very much when finances become settled.

Atkinson ex-Senator Huff is making a good newspaper of the Vooches Sun and complaining somewhat that he has too many subscribers for the capacity of his printing press, yet he most probably feels somewhat lost in that he is not making his regular quadrennial Senatorial campaign in this district. "Duck" was a thorough-going hustler, and was many votes more popular than his party.

Remains of President Cleveland being held or affected with a dangerous constitutional disease are being worked to the limit by aspirin mongers. It appears that in his zeal for protecting the people's interests and through his superior capacity for engaging in the details of his duties the President has overworked himself and needs a rest, which he is getting in the best shape-fitting and "playing" around at his favorite Bay home on the Massachusetts coast.

"The agricultural readers of the Commercial Gazette who are advised not to rush their wheat to market at low prices or feed it to hogs, will have no cause for regret if they follow our advice. The prevailing financial depression can not last long, and when it is over, wheat will return to their normal condition."

The foregoing is an editorial paragraph from the Cincinnati Commercial Gazette, one of the leading Republican papers of the country, and it does not indicate a belief on its part that Democratic political ascendancy is responsible for the financial stringency. Nor is it probable that any well-informed Republican journal believes it.

Some pretend such an absurdity simply to counteract the effect of a knowledge that the Sherman law is being passed by a Republican Congress, signed by a Republican President, and is now credited almost universally by bankers and business men with being responsible for the distrust. The cry of "stop thief!" is a somewhat temporary success of some of the thief himself to distract attention from his villainy, but sooner or later the true thief is found out, if not caught up with.

The Wilson repeal bill passed the House 240 to 110. The free silver coinage amendment at a rate of 50 to 1 was defeated by a vote of 222 to 121. Only 100 Democrats voted for free coinage at 16 to 1.

Two Cincinnati W. U. telegraphers were recently enlightened upon the subject of "How to prevent trousers bagging at the knees." It cost them only 50 cents each to learn that the prevention consists in wearing pants that only come to the knees.

It is generally conceded that the repeal of the silver purchase clause of the Sherman law having passed the House by a good-sized majority, it will also finally pass the Senate, which will putter about it until the nation is about tired out concerning it.

Most brilliant oratory has been delivered in Congress on the silver question than has been heard on any other one subject in late years. Bryan, of Nebraska, for free silver coinage, and Cushman, of New York, against, have made the most showy rhetorical addresses on their respective sides.

WANTED.—A large number of plain, old-fashioned, unimpeachable liars to serve the Preparators' Press Disposal League, headquarters in Dismal Swamp, Virginia. League motto: "The dailies can be worked." Only qualifications, a memory of names and a collection of held old lies about snakes and varmints. Talent is a disqualification.

A dispatch from London, England, says that the stagnation in business there is greater than for years; that all enterprises there are waiting for the United States to repeal the silver purchase law, when there will be a rush for American securities and investments in American enterprises. There is no fear of tariff reform doing damage in that.

The wheat statistics expert, the Hungarian Minister of Agriculture, places the world's wheat crop at 2,279,000,000 bushels, which is one million short of the past ten years' average. As population is rapidly increasing in the countries that use the wheat, his figures would indicate that the price is entirely too low at present. The shortage in wheat importing countries is placed

Richard Templeman, near Wyoming, has growing in his garden a radish that measures 36 inches in circumference. Who can beat it?

The fine young Jack of James H. Powers died several weeks ago, leaving a head that had died this spring and summer on this little creek (White Oak).

A great many people came to Church Sunday expecting to find a meeting under headway conducted by Bro. Kersey, who was announced to begin August 21. From some cause not yet known, Bro. Kersey failed to arrive; nevertheless, we weren't altogether disappointed, as it was our regular day, and our pastor, B. F. Parker, gave us an excellent sermon. So the series of meetings is postponed until sometime in the near future.

KNOB LICK.
